

TECHNICAL DATA SHEET

NASA Battery Water

SECTION 1: Product Description & Advantages

1.1 Product Description

NASA Battery Water is 100% deionized water, which prevents battery plates from sulphonation to ensure better performance and prolonged battery life. This product is essential for maintaining and protecting the battery cells in your car, UPS, and other light and heavy-duty batteries.

1.2 Advantages

1. It is used in all types of light and heavy-duty batteries.
2. Excellent for weak batteries as it ensures perfect charging.
3. Prolongs the life of batteries used in UPS, automotive and generators.

1.3 Directions for Use of Battery Water

1. Open the cap of the battery and check the level of water.
2. Fill the NASA Battery Water as per the level indicator.
3. After filling, close the cap tightly.

SECTION 2: Typical Data

Property	Result
Physical State	Liquid
Appearance And Odor	Clear with odorless liquid
Specific Gravity	1.00
Density at 20 °C , g/ml	0.9982
pH	6.5~7.00
Viscosity at 20 °C	1.00
Boiling Point, °C	100
TDS,ppm	0.0
