

# TECHNICAL DATA SHEET

## NASA Brake Cleaning Spray

### SECTION 1: Product Description & Advantages

#### 1.1 Product Description

**NASA Brake Cleaner** is a high-power formulation designed to clean brake linings, cylinders, drum parts, springs, rotors, caliper units, pads, and other areas of the braking mechanism, with or without disassembly. This cleaner effectively dissolves the hardest grit and grime, ensuring your brakes are completely clean for optimal performance.

#### 1.2 Benefits

1. Residue-free cleaning.
2. High pressure for excellent cleaning results.
3. Cleans brakes effectively.
4. Removes oil, grease and brake fluid.
5. Effectively removes sticky materials.

#### 1.3 Direction of use

1. Lift the car with jack and remove the tire.
2. Shake the bottle well to activate the formula.
3. Hold the bottle approx. 30 cm from the area and spray from the top of the brake to the bottom.
4. After use, allow the brake to dry itself, or use a clean cloth to wipe off

### SECTION 2: Typical Data

Property	Result
Composition	Perchloroethylene, MeCl and additive
Appearance	Transparent
Aroma	Characterisitic
Specific Gravity at 25 °C, g/ml	1.440
Moisture	Nil
pH	6.0
Spray Flow, Per Second	0.5-0.3 gram
Initial Boiling Point, °C	38
Vapour at 40 °C, Cst	0.48

#### DISCLAIMER

This information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process. Such information is, to the best of the company's knowledge and belief, accurate and reliable as of the date indicated. However, no warranty guarantee or representation is made to its accuracy, reliability or completeness. It is the user's responsibility to satisfy himself to the suitability of such information for his own particular use.
