

TECHNICAL DATA SHEET

NASA Contact Cleaner Spray

SECTION 1: Product Description & Advantages

1.1 Product Description

NASA Contact Cleaner is a high-purity, effective precision cleaning solvent designed to meet today's environmental challenges. It improves the performance and reliability of electrical/electronic equipment by cleaning contacts and components quickly and effectively.

Prevents contact failures or malfunctions by dissolving and/or rinsing away contaminants, which holds moisture and causes corrosion or arcing.

1.2 Advantages

1. Non-corrosive and non-conductive.
2. Evaporates completely, leaving no residue.
3. Safe on all metal surfaces.
4. Does not leave stain.
5. Safe on most relays, switches, connectors, plugs and sockets, sensors, and circuit boards.

1.3 Direction of Use

Spray liberally on surface to be cleaned and allow running off. Use extension tube for pinpoint cleaning. Test before use on sensitive materials and allow drying completely before reactivation.

SECTION 2: Typical Data

Property	Result
Composition	Volatile organic compound
Appearance	Transparent Liquid
pH	6.5
Odor	characteristic
Specific Gravity at 25 °C,	0.675
Flash Point, °C	22
Initial Boiling Point, °C	70
Viscosity at 40 °C, cst	0.30

DISCLAIMER

This information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process. Such information is, to the best of the company's knowledge and belief, accurate and reliable as of the date indicated. However, no warranty guarantee or representation is made to its accuracy, reliability or completeness. It is the user's responsibility to satisfy himself to the suitability of such information for his own particular use.
